**How To Use Comping Images**

## What is a comping image?

Comping images are low-resolution watermarked images used only for illustrative purposes, to help choose the best design/layout such as a magazine draft. They cannot be used for any finished project, whether personal or professional.

## Why use a comping image?

Comping images are much smaller in file size due to their low resolution. This means they are easier to move about in a template document, great if you're trialling a variety of images to see which works best for you.

Not only that, it's quicker and easier to download them from Wildscreen Exchange than a full resolution image, as you do not need to download them via an order or enter intended usage information.

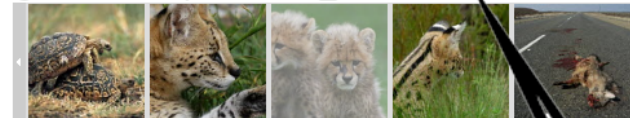

Remember, despite being a comping image, any files downloaded from Wildscreen Exchange must be deleted immediately after use.
